The installation manual is divided into four main panels. Panel 1 shows the lamp being prepared for mounting, with a diagram of the mounting hole (ø8mm) and the base diameter (ø90mm). Panel 2 shows the lamp being lowered into the hole. Panel 3 shows the electrical wiring being connected to the lamp's base. Panel 4 shows the lamp being lowered into the hole and secured. A list of tools and parts is provided, including three screws (B) and one LED tube (C). A warning icon indicates that power should be cut off during installation. A 30-minute timer and a person icon suggest a 30-minute installation time. A power switch icon shows the lamp should be turned on after installation.
